Dear colleagues and friends,

We are happy to organize our gathering of scientists, professionals, and businessmen from the world of aquaculture and hydrobiology in June 2018, in order to communicate results of our research, exchange information and experience, establish new, and improve existing cooperation and partnerships.

This 8th International Conference “WATER & FISH” will take place as before, at the Faculty of Agriculture in Belgrade, which is becoming a centennial Institution in 2019. The city of Belgrade, a capital city of Serbia, is actually the most beautiful and attractive in this period of the year (Serbia has recently been designated by the CNN among world touristic destination that should be visited in 2018). According to the conference title, the main topics are focused on water, as organisms’ habitat, as well as on aquatic organisms, primarily fish. This year, we are focused on biosecurity of aquatic organisms, and also remain open to other topics that you suggested through your conference contributions. As on previous “Water & Fish” Conferences our invited speakers and selected lecturers are among the most prominent names from the world of science. They will be representing number of different countries, associations, institutions, and projects. Our conference is supported by the European Aquaculture Society (EAS) and the Pan-Hellenic Society of Technologists Ichthyologists (PASTI). This year “WATER & FISH” is organized in collaboration with the International Aquatic Veterinary Biosecurity Consortium (IAVBC) from the Faculty of Veterinary Medicine, Ludwig-Maximilians-University Munich, Germany
